

To whom it may concern, I am a truck driver and I am strongly against the HR Bill 4026. Truck drivers and other motorists need to keep their attention on the road, not on a radio dial trying to find up-dated local weather and traffic reports. Knowing where traffic congestion, accidents, etc. are, enables me to avoid these areas and keep my truck rolling, getting my load to its destination on time. This is in turn good for the economy, in the long run. I also like having the choice of listening to a more on the minute, up to date weather and traffic report which XM Radio provides, without having to wait through untold minutes of advertising and BS. like local radio stations have to air in order to keep financial support coming in.
